trust is a weakness

WINDOWS
Insert the CD into the drive - it should autostart the installation.
If the installation doesn't start, open the CD, enter the "install"
directory and run the setup.exe program.

LINUX
Simply extract the compressed file into a directory and run.
You may need to set the attributes of the uplink executable to make it
runnable.

TROUBLESHOOTING
If you have problems, you can run Uplink in safe mode using this command:
uplink +graphics_safemode
